

**Subject: - Mathematics**

## PRACTICE PAPER

## CBSE-7<sup>th</sup>

**Topic: - Integers**

1. Determine each of the following products: -

**Ans. ( $a = -1000, b = 384$ )**

a)  $125 \times (-8)$     b)  $(-2) \times (-4) \times (-6) \times (-8)$

2. Find the value of: -    a)  $28945 \times 99 - (-28945)$

**Ans. 2894500**

3. What will be the sign of the product if we multiply together 21 negative integers and 3 positive integers.

**Ans. Negative**

4. State which is greater: -    a)  $\{(-2) - 5\} \times (-6)$  and  $(-2) - 5 \times (-6)$

**Ans.  $\{(-2) - 5\} \times (-6)$**

5. State True or False: -

a) Of the two integers, if one is negative, then their product must be positive.

**Ans. (F)**

b) The product of a negative and a positive integer may be zero.

**Ans. (F)**

6. Fill in the blanks: -

a)  $\frac{296}{156} = -148$     b)  $\frac{\quad}{156} = -2$

**Ans. ( $a = -2, b = -312$ )**

7. Divide: -    a) 21590 by -10    b)  $\frac{-1357}{0}$

**Ans. ( $a = -2159, b = 0$ )**

8. Find the value of: - a)  $\frac{16.8}{4} - 2 \times 3$     b)  $\frac{-8}{-|2|} - 2$

**Ans. ( $a = -1.8, b = 2$ )**

9. Simplify: - a)  $\frac{63 - \{(-3)(-2 - 8 - 3)\}}{3\{5(-2)(-1)\}}$     b)  $3 - (5 - 6 \div 3)$     c)  $-25 + 14 \div (5 - 3)$

d)  $27 - [38 - \{46 - (15 - 13 - 2)\}]$

**Ans. ( $a = 8, b = 0, c = -18, d = 21$ )**

10. Using brackets, write a mathematical expression for each of the following: -

a) Eight subtracted from the product of two and three

**Ans. ( $a = -2, b = 24$ )**

b) Two multiplied by one less than the difference of nineteen and six.

11. Simplify with BODMAS rule: -    a)  $23 - [23 - \{23 - (23 - 23 - 23)\}]$

**Ans. - 23**

12. Find the value of :- a)  $(-40) \times (-1)(-28) \div 7$

**Ans. - 1600**

13. Verify the following: -

a)  $19 \times \{7 + (-3)\} = (19 \times 7) + [19 \times (-3)]$
